sulle barche sono ancora assaliti dai boxer che uccidono tutti i cinesi del gruppo con gli occidentali resta il solo sheng a bordo di una sola barca fanno una sosta presso una casa abbandonata per procurarsi cibo qui liberano un pazzo tenuto in una gabbia secondo l'uso cinese poi si fermano per la notte sull'isolotto di un pescatore che dapprima è diffidente poi offre loro ospitalità 8 il fiume di fuoco ma il pescatore li tradisce di notte avverte i boxer che guidati ancora da ping ciao cercano di catturare i fuggitivi appiccando il fuoco alla vegetazione alle rive del fiume roberto muscardo si avvede in tempo del pericolo e riprendono la fuga riuscendo finalmente a raggiungere la giunca con la quale sperano di continuare la fuga con più tranquillità 9 sul canale imperiale con la giunca di men li vecchio cinese convertito cominciano a navigare verso tientsin dove sperano di trovare le truppe occidentali venute a combattere i boxer che stringono d'assedio a pechino senza che l'imperatrice riesca a contrastarli le legazioni straniere lungo il canale imperiale incontrano barche messe a guardia da ping ciao men li finge di essere anch'egli al servizio del mandarino e inganna le guardie ma poco dopo sentono approssimarsi altre barche dei boxer e non hanno altra scelta che affondare la giunca e rifugiarsi in una palude vicina 10 la laguna della morte attraversano una putrida palude detta della morte per le cattive esalazioni delle acque e trovano riparo in un tempio buddista abbandonato poco dopo sentono in lontananza i latrati del cane di men li che il vecchio aveva abbandonato sulla giunca per non avere intralci nella fuga e temono che li abbia seguiti aiutando i boxer a trovarli 11 il cane del pescatore e infatti è proprio così i boxer sempre comandati da ping ciao e da sum che odia gli europei perché uno di essi ha ucciso suo fratello si sono fatti guidare dal cane che poi hanno ucciso e si apprestano ad assaltare il tempio 12 la vittoria dei banditi i boxer irrompono nel tempio e nonostante la strenua difesa degli assediati hanno la meglio tutti rimangono uccisi tranne sheng enrico roberto e padre giorgio che ping ciao fa catturare vivi per poterli torturare 13 il campo di palikao i prigionieri vengono condotti a palikao nel settentrione ove si trova un grande campo di boxer sono chiusi in gabbie tranne roberto che viene imprigionato in un pesante asse di legno detto kangue che gli stringe testa e polsi durante il cammino possono vedere pechino in fiamme in preda alla rivolta dei boxer a palikao vengono condotti nel cosiddetto campo della giustizia in cui i cristiani vengono sottoposti ad orribili torture 14 il supplizio di pettini padre giorgio è condannato al supplizio di pettini che consiste nel far ondeggiare con una fune il condannato tra due file di denti aguzzi ma prima che il supplizio cominci ping ciao lo ferma egli vuole sapere dove si trova il figlio wang che non vede da quando si è convertito gli dicono che è a pechino in realtà da due anni padre giorgio non ha sue notizie e ping ciao decide che condurrà padre giorgio a pechino per cercare wang gli altri resteranno al campo dove però operano segretamente delle società la croce gialla e la croce di pei ho che si occupano di mettere in fuga i cristiani prigionieri o di attenuare le loro sofferenze 15 la fuga padre giorgio parte con ping ciao per pechino gli altri riescono a liberarsi grazie al capo della croce gialla che dà loro coltelli e intontisce le guardie con l'oppio poi vengono liberati anche dodici cinesi cristiani condannati a morire di fame ottenuti cavalli e abiti si dirigono verso pechino fingono di essere boxer che hanno catturato dei cristiani e riescono ad entrare in città sconvolta dalla rivolta 16 gli orrori di pechino a pechino prendono possesso di una ricca casa abbandonata poi il giorno successivo si mettono in contatto con il gruppo locale della croce gialla il cui capo propone di far rientrare wang dalla mongolia dove si è rifugiato e di intraprendere qualche iniziativa nei quattro o cinque giorni che saranno necessari per il suo arrivo roberto ed enrico hanno modo di vedere come pechino e in particolare le legazioni straniere sono messe in pericolo dalla rivolta 17 la caccia al mandarino approfittando del fatto che ping ciao e sum in quanto contemporaneamente rappresentanti imperiali e alleati dei boxer girano per la città si decide di tendere loro un agguato nella casa di ping ciao nella zona chiamata mongola di pechino destinata a stranieri e cinesi normali mentre padre giorgio è prigioniero nell'inespugnabile zona imperiale detta città tartara sum viene catturato ma ping ciao riesce a fuggire 18 la confessione di sum minacciato di morte rivela che padre giorgio è prigioniero in un sotterraneo della casa di ping ciao e che il giorno dopo le porte della città tartara saranno aperte perché l'imperatrice è stata destituita dall'usurpatore tuan che riceverà i capi dei rivoltosi boxer per accordarsi con loro il capo della croce gialla costringe sum a firmare un lasciapassare col quale roberto enrico e quelli della setta entreranno nella città tartara per cercare di liberare padre giorgio 19

la prigione nera roberto enrico sotto vesti cinesi e gli affiliati della croce gialla entrano nella città tartara e trovano la casa di ping ciao vi sono solo servi perché il padrone è impegnato nelle riunioni con i capi boxer fanno irruzione e costringono i servi a rivelare dove è nascosto padre giorgio egli si trova in un carcere nero un pozzo mezzo pieno di immondizie dove i condannati vengono calati e quasi lasciati morire di fame riescono a tirare fuori padre giorgio ma è troppo tardi appena estratto il missionario provato dalla fame e dalla prigionia muore in quel momento si ode giungere la guardia imperiale 20 rinchiusi nel sotterraneo ping ciao avvertito della cattura di sum è accorso alla sua casa per accertarsi delle sorti del missionario lo trova morto tra le braccia del fratello roberto enrico e gli affiliati della croce gialla rimangono intrappolati nel sotterraneo dove si trovava il pozzo prigione di padre giorgio ping ciao che ormai dispera di riuscire a sapere dove si trova il figlio wang decide di eliminarli facendoli annegare 21 la vendetta del gigante gli imprigionati tentano una disperata sortita ma sono catturati il capo della croce gialla un uomo di statura gigantesca riesce a nascondersi esce all'improvviso ferisce mortalmente ping ciao e fugge gli altri stanno per essere fucilati ma in quel momento giunge wang ping ciao gli chiede perdono per avere ucciso padre giorgio ordina che roberto enrico e gli altri non vengano fucilati poi muore epilogo wang riesce a portare in salvo roberto ed enrico evitando che finiscano vittime della rivolta che ancora impazza così i due con sheng che li ha sempre seguiti fedelmente possono imbarcarsi su una delle navi italiane giunte con le truppe occidentali per cercare di soffocare la rivolta dei boxer fonte wikipedia

50: The Unsung Hero of Measurement – A Deep Dive into Feet

Ever stopped to think about the seemingly simple act of measuring? We take it for granted, but the very foundation of construction, design, and even everyday life rests on precise measurement. Today, we're going to dissect one particular unit: 50 feet. Yes, just 50 feet. But beneath this seemingly insignificant number lies a world of fascinating possibilities, challenges, and real-world applications that go far beyond simply measuring a short distance. Let's delve in!

Section 1: 50 Feet in Context: More Than Just a Number

50 feet isn't just a random length; it's a significant marker in numerous contexts. Consider the humble football field: it's a little over 50 feet shorter than the entire playing area. In residential construction, it might represent the approximate length of a typical two-car garage, plus a few feet of extra space. Think of the implications: planning a driveway, deciding on the positioning of a garden shed relative to the house, or even understanding the reach of a sprinkler system – 50 feet is constantly at play. In landscaping, 50 feet could be the length of a planned walkway, the width of a desired garden bed, or the distance required for effective tree spacing. The point is: this seemingly modest distance significantly influences design and functionality in countless situations.

Section 2: 50 Feet in Construction and Engineering

In the world of construction and engineering, accuracy is paramount. 50 feet might represent a critical dimension in a variety of projects. Imagine constructing a retaining wall: calculating the precise length of 50 feet is crucial for structural integrity. A slight miscalculation could lead to instability, causing potential safety hazards and costly repairs. Similarly, in bridge construction, 50 feet might represent a key span length in a larger project, demanding meticulous planning and execution. Even in smaller projects like building a deck, accurate measurement of 50 feet (or a multiple thereof) ensures a structurally sound and aesthetically pleasing outcome. Ignoring this can result in improperly fitting materials, jeopardizing both safety and aesthetics.

Section 3: 50 Feet and the Human Experience

Beyond the technical aspects, 50 feet holds significance in our lived experience. Consider the visual perception of distance. While seemingly short, walking 50 feet can surprisingly reveal details overlooked from a greater distance. This simple act could uncover hidden flaws in a construction project, allowing for timely corrections, or highlight a unique feature of a landscape that wasn't readily apparent from afar. Furthermore, in sports like basketball or American football, 50 feet represents a significant distance on the court or field, impacting strategy and gameplay. The mental image of 50 feet changes depending on the context. It's manageable for walking but a considerable throw in football. This perspective shift underscores the contextual nature of measurement.

Section 4: Tools and Techniques for Accurate Measurement of 50 Feet

Achieving accurate measurements of 50 feet requires the right tools and techniques. A standard measuring tape is ideal for shorter distances, providing clear markings for precision. For longer distances, however, laser measurers offer greater accuracy and convenience. These devices use laser beams to determine distances electronically, minimizing human error. Moreover, employing proper surveying techniques, including using reference points and multiple measurements to verify accuracy, is crucial for complex projects. Understanding the limitations of different measuring tools and choosing the appropriate one for the task at hand is crucial for avoiding costly errors. For instance, using a standard tape measure across uneven terrain would be inaccurate, whereas a laser measurer can account for variations in elevation more effectively.

Section 5: Conclusion: Appreciating the Significance of 50 Feet

In conclusion, 50 feet, while seemingly a small unit of measurement, plays a significant role in various aspects of our lives. From the intricacies of construction and engineering to the everyday experiences of walking, sports, and landscaping, precise measurement of this distance is crucial for safety, efficiency, and aesthetic appeal. By understanding the tools and techniques for accurate measurement and appreciating the context in which 50 feet operates, we can improve our understanding of the world around us and appreciate the importance of precision in measurement.

Expert-Level FAQs:

1. How does temperature affect the accuracy of a 50-foot measurement using a steel tape measure? Steel tape measures expand and contract with temperature changes. Significant temperature variations can lead to measurable inaccuracies. For precise measurements in extreme temperatures, temperature-compensated tapes or laser measurers are recommended. 2. What are the best practices for establishing a baseline of 50 feet in surveying for large-scale projects? Establishing a baseline involves using precise surveying equipment like total stations and GPS receivers to determine a perfectly straight and accurately measured 50-foot reference line. This requires understanding concepts like leveling, alignment, and coordinate systems. 3. How can errors in 50-foot measurements be minimized during construction of a retaining wall? Minimizing errors involves meticulous planning, using multiple measurement techniques for verification, and employing experienced professionals. Regular checks throughout the construction process and leveraging laser levels can ensure accurate placement and prevent costly rework. 4. What are the legal implications of inaccurate 50-foot measurements in property boundary disputes? Inaccurate measurements can lead to significant legal disputes, potentially involving costly surveys and court proceedings. Precise and legally documented measurements are essential to avoid boundary conflicts. 5. How does the concept of significant figures affect the reporting of a 50-foot measurement in a scientific context? Depending on the precision of the measurement tool used, a 50-foot measurement might be reported as 50.0 feet (three significant figures) or 50.00 feet (four significant figures) to indicate the level of accuracy achieved. Proper significant figure notation is crucial for accurate scientific communication.
